

Diagnostic report: Mg I

Computed levels: 5

Matched to NIST: 5

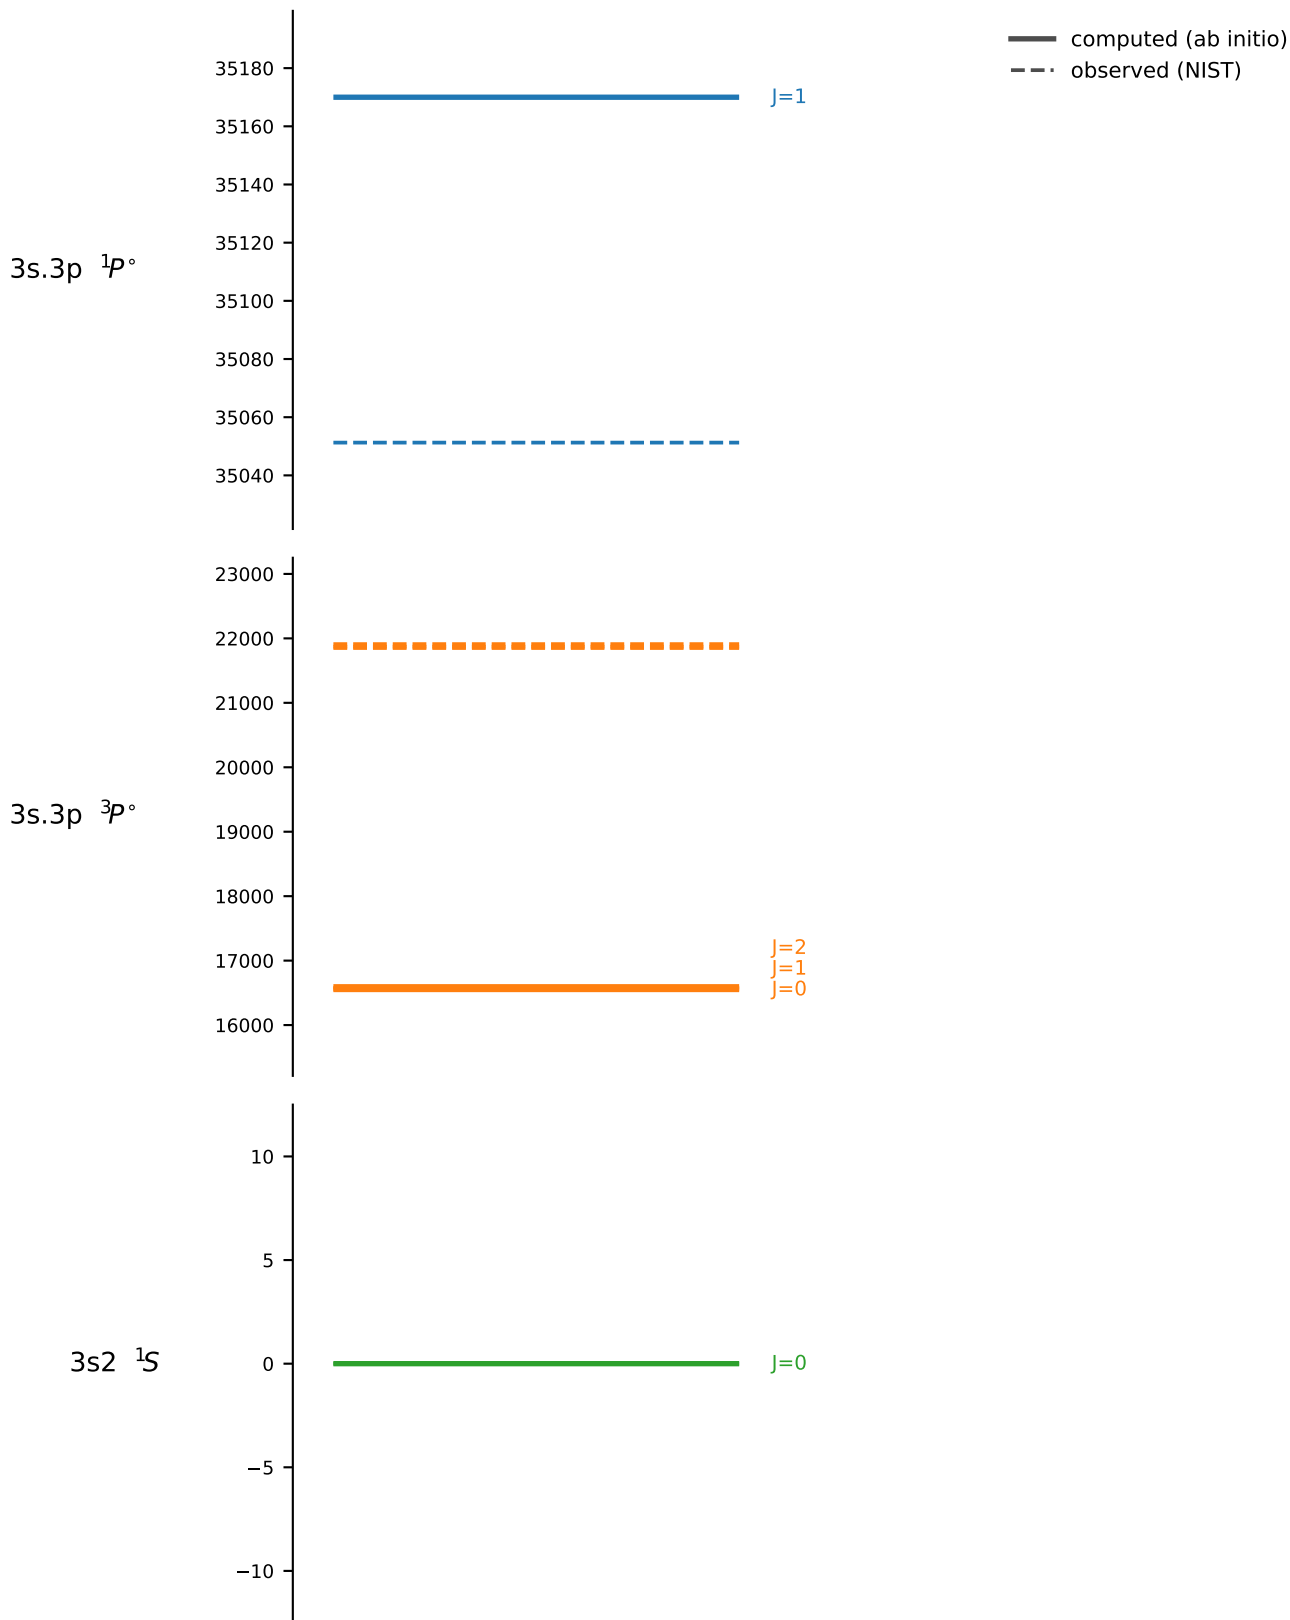

Computed E1 lines: 1

Pre-fit RMS ($E_{\text{calc}} - E_{\text{obs}}$): 4111 cm^{-1} (ab initio, no RCE fit yet)

Strongest computed lines:

$\lambda(\text{\AA})$	log gf	upper term
2843.34	+0.405	(2S) 1P

Mg I: energy levels (one panel per term)

Increasing upward). In each panel: solid = computed (ab initio), dashed = observed (NIST); the vertical gap is the error, and the spread

Mg I: level-fit residuals (RMS = 4111 cm⁻¹, ab initio)
